

Job Description

Senior Developer (.NET, C#, SQL Server)

We are looking to hire a Senior Developer in our Product Development organization. A successful candidate will have strong analytical, technical, and communication skills as well as extensive hands-on experience building .NET, C#, and SQL server applications. You must have proven experience coding high-performance Multi-Threaded API's (hundreds of transactions/sec), complex SQL Stored Procedure (billions of rows), Sockets Programming and Windows Services. Additionally, the ideal candidate will also have experience interfacing to Active Directory, LDAP, MS Exchange, OneDrive, knowledge of Azure/AWS automation and experience with UI Frameworks (e.g. Vue, React, Angular, D3).

This is an exciting opportunity to be part of a growing Cybersecurity company and to help develop and shape the initiatives and strategy of a growing Product Development team. Under the direction of the Application Development Manager, this position will help solution business requirements and establish technology direction to support Product Roadmaps and Sphere vision.

If you are a self-starter who enjoys problem solving, collaborating on Agile teams and thrives in a fast-moving, ever-changing startup environment, then read on!

Essential Functions:

- A SENIOR DEVELOPER that excels at designing and developing high quality products with intuitive interfaces and has the drive to ensure that the success criteria are met within budget and schedule constraints.
- Well versed in Coding, Scripting, Test Automation, Load Testing and Performance Tuning.
- Design and implement technology solutions keeping in mind key architectural attributes (e.g. security, reliability, scalability, maintainability, etc.)
- Work closely with the QA team to integrate software quality build best practices and ensure quality standards are met.
- Work to automate unit and regression testing during Software Development Life Cycle (SDLC).
- Report development status to project stakeholders.
- Work with peers to troubleshoot and resolve project issues.
- Participate in project release efforts ranging in scope from small to very large.
- Guide and mentor junior developers.
- Develop positive relationships with business partners to better understand their needs, manage expectations, and deliver value-add solutions.
- Collaborate with other teams (technical and non-technical) to ensure successful project delivery and adherence to SDLC processes.

Requirements:

- Minimum Education B.S. in Computer Science, IT or related field.

- Ten+ years' experience with product development and architecture of software, applications, and services.
- ASP .NET Core & Framework, C#, SQL Server, JavaScript
- Experience with designing and implementing mission critical systems that manage large scale data sets.
- Excellent complex SQL coding and SQL tuning skills.
- In-depth experience creating API/Service interfaces.
- Thorough understanding of SDLC, Agile/SCRUM Methodology, CI/CD, DevOps.
- Proficiency with source control methodologies, branching, patching, etc.
- Prior experience in onshore-offshore development projects.
- Excellent organizational and communication skills, both oral and written.
- Ability to facilitate, influence and manage change to deliver solutions.

Additional Information/Skills:

- Entrepreneurial drive demonstrated ability to achieve stretch goals in an innovative and fast paced environment. Able to fit in well within a startup environment.
- Prior experience working for a data governance product vendor (e.g. Varonis, CyberArk) and/or financial services is a plus.
- Advanced skills of test-driven development.
- Experience in the following technologies is a plus:
 - Storage platforms (Windows, NetApp, EMC Isilon, NAS, NFS)
 - Device connectors (Unix, Windows, SCCM, ServiceNow, CMDB, Active Directory)
 - 3'rd party interfaces (OneDrive, SharePoint, Microsoft System Center, Active Directory, PeopleSoft, Office 365)
 - Databases (SQL Server, Oracle or Sybase)
 - Map Reduce Frameworks (Hadoop)
 - T-SQL, PowerShell, Python, VueJS, JQuery, Visual Studio, Git, VSCode, SQL Server Management Studio, Jenkins
 - UI Frameworks (Vue, React, Angular, D3)
